

# Heavy Haul

Brock Transportation is a leader in the movement of over size and over weight shipments. We have a group of agents that move these types of shipments daily. Brock has the capacity to move most oversized and over weight shipments and has access to flatbeds, stepdecks, double drops and other more specialized equipment. Daily we meet the needs of our heavy haul customers.

With our Macropoint Technology, we (and you) are able to continuously monitor the location of your shipment from origin to destination.
